

Adding AidQuest JavaScript Code to WordPress

AidQuest JavaScript code should be added to the footer section of your website. This way the code is loaded on every page and the chat feature becomes active on every page of your website.

ettings	
cripts in Header	
	Jt Settings
	Conoral
hese scripts will be printed in the <head> section.</head>	General
Scripts in Footer	writing
	Reading
	Discussion
	Media
	Permalinks
	Deture
have excite will be printed shows the chody. too	Privacy

- 1. Copy the code provided by AidQuest
- 2. Got o Settings
- 3. Go to Insert Headers and Footers or Header and Footer Scripts.

(NOTE: If you don't have a plug-in that allows your WordPress site to add headers and footers you need to install something like: https://wordpress.org/plugins/insert-headers-and-footers/)

- 4. Paste the code into the Footer section
- 5. Save

The chat button should now appear on your website pages.
